TempleOS

TempleOS is a shitty Bible-themed, easily exploitable, 64-bit operating system with no network support made by schizophrenic Christian **Terry A. Davis** (Terrance Andrew Davis, b. Dec. 15, 1969; age 47). Lots of drama happened in Terry's IRL life because of his insanity; and his life work and legacy. A shitstain OS he imposed upon the Internet, also caused him drama.

Someone pretending to be Linus Torvalds calling him a retarded fuck

Biography

Davis lead a pretty retarded life.

In the mid 90s, after noticing that he was being followed by people for an unknown reason; this made him paranoid. So he got in his car and drove non-stop without direction; the voices from the radio instructed him to go south to Texas. At Texas he disassembled his car in search for tracking devices, threw his keys into the desert then walked away. A police officer saw this then put him in his police car. He got the fuck outta there: breaking his collarbone on the high way. In the hospital the doctors were talking about x-ray results; he thought they were talking about alien artifacts in his chest. He got the fuck outta there and stole a truck which lead him to be incarcerated. He later electrocuted himself while nude. He then lived in his parents' basement developing TempleOS.

A former Atheist, Mr. "God told me the resolution had to be 640 by 480 pixels with only 16 colors" Davis wrote TempleOS using "HolyC", a variant of the C programming language. According to Davis, the operating system is partly developed by God (he allegedly heard the voice of God telling him what the OS should feature) and dedicated to God.
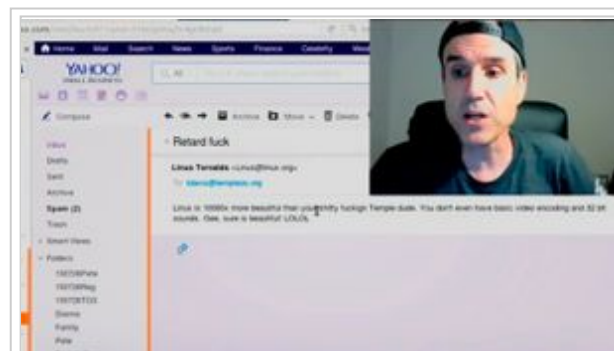

Davis argued that the CIA baited him with children to evoke a sexual response from him; however, since the CIA is "atheist retard niggers" their plan "backfired".

This man wrote some lulzy shit, and he sometimes says unintelligible (https://www.youtube.com/watch?v=FPC0_k3lt0c) word salad (https://rbt.asia/g/thread/61335290). With his insane creativity he wrote this at the official website for his operating system:

```
King James Bible               Notes on Talking With God

I live in a CIA prison.  A nigger runs my prison.  In prison, the nigger tries
to torment me.  We can take away his knives by confessing, every day.  In about
2000, I masturbated fantacizing about my niece, Lani.  She looks like Star Trek
Seven of Nine!  In 1985, at my sister's wedding, I stuck my crotch on the hot
tub drain because it kinda sucked.  In 1985, I tried to get a dog to lick my
dick.  From 1998-2003, I fantacized about leading a Catholic army like Dune, of
Mexicans or Brazilians?  That was dumb because they're niggers.  In 2003, I
played tag with a black girl about 7-years-old.  She reached for my crotch.  In
high school, in the library, Carlos and I said 'juicy' or 'toxic' as a way of
evaluating girls.  In 1988, I cheated on my SAT by talking in the hall during
the break -- two problems.  On 9/9/1999, I killed a CIA nigger on purpose with
my car. :-)  In 1982, when I was 12, I babysat Kevin's kids.  I changed a diaper
because I thought that was being professional.  In 1975, when I was about age
```

```
five, my brother, Keith, put my penis in a vacuum.  In 1977, when I was about
age seven, my brother, Danny, got me high on gas fumes and we sucked each
other's dicks.  Dr. Tsakalis had an oddly round ass.  Paul Keck at Xytec had an
oddly round ass.  Distracting?  At about age five, Jay Weinrick and I touched
dicks to each other's assholes.

----05/15/17 07:23:02----
```

In his video, Mister Metokur asked the viewer to imagine going to http://windows.microsoft.com/ and seeing this in the "About us" section:

> *Protect yourself today from all the little glow in the dark nigger faggots that want to steal your precious white semen. Baseball bats work too.*
>
> *In 1972 Bill Gates and I killed a hooker, well she was 8 years old, but I'm sure she was a whore so it still counts. Sometimes I role up moist towelettes and insert them into my anus and bark at my neighbors. It teaches them who is in charge. I am. I am the alpha. They are the nigger faggot.*

—Perfectly rational

Excluding Twitter, he is unsurprisingly banned from many forums:

> *Unfortunately Terry also suffers from schizophrenia, and has a tendency to appear on various programming forums with a burst of strange, paranoid, and often racist comments. He is frequently banned from most forums (https://news.ycombinator.com/item?id=7818823)*

—positive points (http://www.codersnotes.com)

Terry became anti-social after people started to mess with him more frequently and he stopped doing livestreams as a result, deleting a lot of info on his site.

Criticism

While the general consensus is that his operating system is a joke, some argue that people should take a hugbox approach to responding to his OS:

> *I'm reminded of a movie I once saw called Lars And The Real Girl, in which a man buys a RealDoll and treats her as his real girlfriend. Rather than laughing at him, the residents of his town instead band together and treat her as if she were a real person too. When I started watching it, I expected some Will Ferrell-esque comedy where this guy would be played only for laughs. Instead, I found an incredibly compassionate story within. The writer, Nancy Oliver, got the idea after thinking:*
>
> *"What if we didn't treat our mentally ill people like animals? What if we brought kindness and compassion to the table?"*

—positive points (http://www.codersnotes.com/notes/a-constructive-look-at-templeos/)
